

# Case Study: CrossFit Construct

CrossFit Construct is the gym I go to in Chicago.

The gym's website was not mobile responsive (didn't re-size on phones or tablets), and not very visually appealing.

# Case Study: CrossFit Construct

The owner was ready for an entirely new look. His wife designed the site, and I developed it to make her design come to life. The site is now much easier to use and understand, and responds to all screen sizes.
