

Case Study: Dianne J

Dianne needed a site that was mobile-friendly, but still kept her ads on every screen size.

A previous designer had used a theme that did not respond to screen size changes. Here's how it looked on smaller screens:

Case Study: Dianne J

My solution for Dianne was to move her to Genesis, (a mobile-friendly theme) and keep the site design as close to the original as possible.

Dianne also requested that her ads show on her blog page, no matter what device people were visiting her site on. There are 3 page templates on her site:

Full-width (no sidebar)

Two sidebars (blog page)

One sidebar (all other pages)

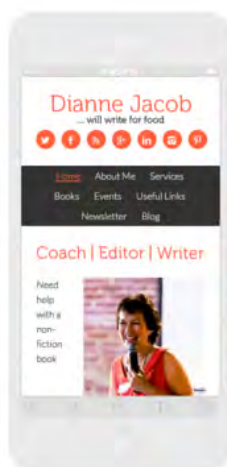

Case Study: Dianne J

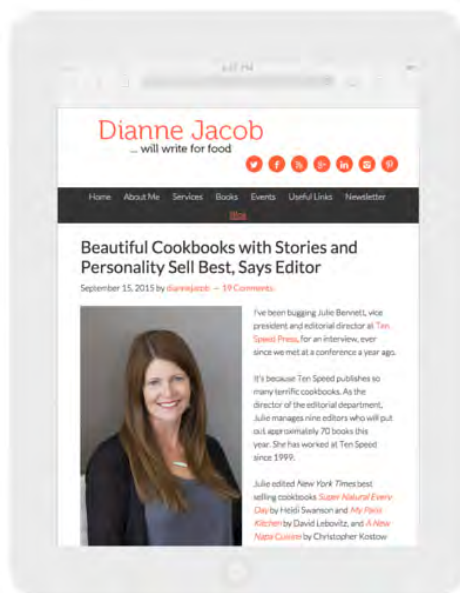

Here are some screenshots of the updated site on smaller devices:

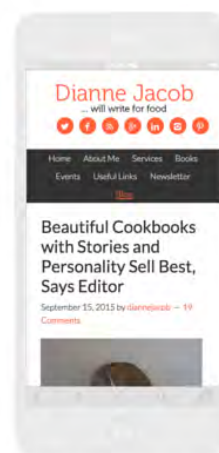

iPad portrait - width: 768px

iPhone 6 portrait - width: 375px

iPad portrait - width: 768px

iPhone 6 Plus portrait - width: 414px

"Tiffany is professional, knowledgeable and met her deadline. She went over and above the parameters of the task to satisfy my questions and comments. I'd hire her again in a minute!" - Dianne Jacob, diannej.com
